

## **IR ASSIGNMENT 6 README FILE**

The graph I have used for both the questions is the Wikipedia Vote network, the link for which is given below:

<https://snap.stanford.edu/data/wiki-Vote.html>

All the code along with the saved results has been submitted as ipynb file.

All the analysis has been done along with the results is given in Analysis file.

To run the code files the file Wiki-Vote.txt that I have given in the submission along with the codes needs to be in the same folder as the code files.
